HUMAN IMPACT PARTNERS

Kay Houghton & Associates
Keller Williams Metro Center
703-CALL-KAY | www.khassociates.com

Georgia Health Policy Center
Objectives

- Build the community of HIA practitioners by offering an intimate forum to network and share ideas and tools that elevate the practice of HIA
- Promote excellence in HIA by sharing best practices, tackling challenging HIA-related issues, and disseminating resources and work products developed by practitioner working groups

Agenda

**Monday, October 2nd**

<table>
<thead>

PANELISTS & SPEAKERS

Andrew Dannenberg

Dr. Dannenberg is an Affiliate Professor at the University of Washington (UW) in Seattle with faculty appointments in environmental health in the UW School of Public Health and in urban planning in the UW College of Built Environments. He formerly served as Team Lead of the Healthy Community Design Initiative in the National Center for Environmental Health at the Centers for Disease Control and Prevention in Atlanta. For the past decade, his research and teaching has examined the health aspects of community design including land use, transportation, urban planning, and other issues related to the built environment. He has a particular focus on the use of a health impact assessment as a tool to inform community and transportation planners about the health consequences of their decisions. He has participated in a number of HIAs and currently teaches a graduate level course on HIA at the University of Washington. He is co-author with Howard Frumkin and Richard Jackson of Making Healthy Places: Designing and Building for Health, Well-being, and Sustainability published by Island Press in 2011 (www.makinghealthyplaces.com).

Anna Stevenson

Dr. Anna Stevenson is a New Zealand trained Public Health Physician. Prior to completing specialty training in public health, Anna worked in family medicine in urban and rural locations in New Zealand, and also worked in aid and community development in Israel, Palestine and Pacific countries. Dr Stevenson has led the reorientation of the Canterbury District Health Board’s Public Health Unit, Community and Public Health, to an organization fully committed to using a Health in All Policies (HiAP) approach. Her team are involved in a wide range of HiAP work including Health Impact Assessments, submissions, policy writing and its implementation together with local and national government where capacity building is an important goal. A focus on equity and working as trusted partners with New Zealand Māori under the nation’s founding document, the Treaty of Waitangi (Te Tiriti o Waitangi), is central to the HiAP team’s approach.
Chris Ollson

Dr. Chris Ollson is owner and an Environmental Health Scientist at Ollson Environmental Health Management, located in Toronto, Canada. He has 20 years of international consulting experience in environmental health and toxicology. Chris is an expert in health issues related to the energy sector. He has led assessments and communication efforts in renewable energy, Waste To Energy, and for conventional oil and gas projects across North America. His HIA experience spans the past decade when he first helped Toronto Public Health develop their HIA guidance document. Chris has spent countless hours in community and stakeholder consultation ensuring they were part of the decision-making process on environmental issues. In addition, he holds an Adjunct Professorship at the University of Toronto and recently supervised a doctoral student in development of novel HIA methods for integration within environmental assessment.

Celia Harris

As a Project Director at Human Impact Partners, Celia has over nine years of work experience centered on the practice of HIA. She’s led and contributed to over 20 HIA and HiAP projects analyzing policy topics ranging from land use and transportation to education and criminal justice, and has provided HIA training and technical assistance to numerous groups around the United States. Within these roles she’s worked with a variety of stakeholders and policy contexts, keeping health equity as a focus. Before joining HIP, she earned a Master’s degree in Public Health from UC Berkeley, and prior to that she worked for six years as an environmental consultant.

Kristin Raab

Kristin Raab is the Health Impact Assessment and Climate Change Program Director at the Minnesota Department of Health. Her work focuses on changing built environment policies, systems and designs to encourage sustainability and improve people's health. Ms. Raab has presented HIA training to numerous audiences and has led and/or provided technical assistance to over nine HIAs in Minnesota and other states. As an adjunct assistant
professor at the University of Minnesota, she has taught an undergraduate course on sustainable site design in landscape architecture. Ms. Raab has presented at state and national conferences and has published articles on health-related topics. She also helped develop health-related performance measures for the Sustainable Sites Initiative, an interdisciplinary effort by the American Society of Landscape Architects, the Lady Bird Johnson Wildflower Center at The University of Texas at Austin, and the United States Botanic Garden to create voluntary national guidelines and performance benchmarks for sustainable land design, construction, and maintenance practices.

Greg Tung

Dr. Greg Tung is an Assistant Professor at the Colorado School of Public Health. His research interests relate to how scientific evidence is incorporated into policy and program decision making, with a special emphasis on injury prevention. He works on a diverse range of injury topics, including the prevention of youth violence, suicides, poisonings and child abuse. Dr. Tung's research interests also include the integration of health services and public health systems. He is a mixed methods researcher and utilizes both quantitative (e.g. longitudinal, multi-level, and time-to-event analysis) and qualitative (e.g. case studies) methods. Dr. Tung is also faculty in the Pediatric Injury Prevention, Education and Research (PIPER) Program and the blog editor for the journal Injury Prevention.

Tatiana Lin

Tatiana leads Kansas Health Institute’s community health improvement strategy team, setting direction for projects aimed at promoting the health of Kansas communities. Since 2010, she has worked on exploring opportunities for incorporating the Health in All Policies approach into policymaking at the state and local levels. Lin has been leading a cross-agency team to conduct Health Impact Assessments in Kansas. She has served as the project director for four HIAs. One of the HIAs received numerous awards, including the Best HIA of 2012. She previously worked for the Kansas Legislative Research Department, where she staffed the House Health and Human Services Committee and the state’s Autism Task Force. She has also been a facilitator and interpreter for programs at the U.S. Library of Congress Center for Russian Leadership Development.
**ADDITIONAL INFORMATION**

**Workshop Break Out Rooms**

Plenary, lunch, and break out rooms are spread across floors 2, 3 and 4. The plenary room (Americas) is found on floor 2 and all sessions will be held in that room unless otherwise noted. Lunch will be served in the café on the second floor. A map of the workshop space can be found on pages 12-14. The break out rooms being utilized for the workshop include:

- European Union (Floor 2)
- Arctic (Floor 3)
- Hawai‘i (Floor 3)
- New Mexico (Floor 3)
- Oklahoma (Floor 3)
- Alaska (Floor 4)

**Transportation**

Public Transportation:
The two closest metro stations to the workshop venue are the Gallery PI-Chinatown Station (green, red, and yellow lines) and the Archives-Navy Memorial – Penn Quarter Station (green and yellow lines). Please see the D.C. Metro System Map on page 15. There are multiple bus lines that stop close to the workshop venue as well.

Bikeshare:

*Capital Bikeshare stations close to the workshop venue:* 7th and F St NW/National Portrait Gallery; 10th and E St NW

*Mobike, Spin, and LimeBike:* download the app on your iOS or Android device to use these three dockless bikeshare companies

**Nearby Restaurants**

Breakfast and lunch will be provided both days and the happy hour at La Tasca includes complementary appetizers, but we know you might want to grab an early morning coffee or a dinner close to the venue. Below are a few suggestions.
